

An educator, making data-driven decisions which modify curriculum and student services, requires recent and accurate assessment results and multiple points of data. However, collecting current data and quickly making it available to your staff places additional stress on an already overworked administration.

At School Data Solutions, we understand just how busy you are. To ease the strain of providing current data, we offer three levels of data loading support. With our help, you can keep your Homeroom assessment data fresh and relevant, supplying the information your staff needs to make quality decisions.

State

Assessments included and number of times loaded per year.

- EOC (1x)
- ID-AA (1x)
- Idaho Reading Indicator (3x)
- ISAT Science (1x)
- ISAT Summative (1x)

- ACT
- DMA
- DRA
- DWA
- Envisions Math
- FitnessGram
- GATES/MacGinitie
- SAT/PSAT
- SMI
- SRI

\$2,000

Annual Fee

i Data Loading Information

Data will be loaded according to dates provided by the district, plus or minus five (5) business days. Upon completion of the Data Loading Order Form, a document will be provided to enter assessment dates. If dates are not provided, data will not be loaded.

If you are utilizing one or more of our automatically migrated assessments, such as STAR or i-Ready, they will not count as an added assessment with the **State +5** or **+10** package.

State: No data is needed from the district. However, School Data Solutions must have access to ORS and TIDE 30 days prior to the first data release.

State +5 and +10: The district must forward necessary assessment data electronically as a comma-separated (csv) file ten (10) days prior to the required load date. Alternately, the district can assign access credentials to School Data Solutions 30 days prior to the first testing window.

The district must provide assessment data electronically or provide access to third-party vendor sites. Access information (site address, username, and password) must be provided 30 days prior to the first testing window.

School Data Solutions will continue to bill the district each year, the annual fee selected on the Data Loading Order Form, unless a new form is provided by the district. Modifications to assessment selection requires a new Data Loading Order Form.

⚠ Disclaimer

Assessment loading dates must be provided within 30 days of the start of each new school year. Any updates or changes to loading dates must be submitted to SDS as soon as possible.

School Data Solutions utilizes default file assessment test structures. Customization of default structures, such as performance level ranges, labels, or colors, and development of new assessment structures, will be billed at an additional service rate of \$35 per hour.

School Data Solutions is not responsible for incorrect data received from the district. Cleanup of data, including but not limited to bad student identifiers, jumbled scores, wrong years, and out of ranges scores, will be billed at an additional service rate of \$35 per hour, and may result in loading delays.
